Hi Emily,

Can you please add this to incoming correspondence for Lincoln Quarry M/049/0086? This does not prompt a task, I think we can just give it an "Accepted" stamp and add it to the file.

Thank you.

April

Subject: Ames Construction LMO

To: April Abate <aprilabate@utah.gov>

Hello April,

In January 2013, DOGM approved a LMO for Ames on West Mnt called the Lincoln Quarry (M/049/0086), as I'm sure you are aware of.

At that same time Ames was working on getting a Mineral Material Sales contract for the material through our office, but never signed the contract and told us things were on hold. OMAG has a contract for the material but that will expire on July 26, 2014.

Last week I met with Chris Ennes (Ames) and Chris McKee (OMAG) and they expressed an interest in finalizing the contract and today Ames signed the contract and are now approved by the BLM to begin operations at the Quarry under our sale and I assume your LMO?

I've attached a copy of our sales contract and if you have any questions about this situation, it is a little different due to the fact that this is a mineral material sale and not a mining law operation on our end, feel free to contact me.

Thanks.
